HIGH PERFORMANCE VERTICAL
MACHINING CENTER FOR DIE / MOLD MACHINE

VM

5400 · **6500**

DN SOLUTIONS

VM 5400 · 6500

The efficiency and competitiveness achieved by the user is optimised by the core features which are standard on the machine. These include face / taper contact spindle nose (BBT40), effective spindle cooling system and air blower for chip removal when dry cutting. These features contribute to the machine's capability to produce high quality dies and moulds.

HIGH RIGIDITY STRUCTURE

- The arch style minimizes deformation during heavy duty cutting and maintains stable precision levels.

HI-SPEED, HI-PRECISION SPINDLE

- High torque 15.6 kW serial spindle motor ensures stable precision levels in machining metal molds.

CONVENIENCE IMPROVEMENTS FOR OPERATOR

- Various chip handling devices are provided for enhanced user convenience.

BASIC STRUCTURE

In addition to higher durability and an excellent vibration absorption feature, the static stiffness and dynamic stiffness have been improved by 30%, thanks to the Finite Element Method (EFM).

High Rigidity

The highly-rigid body found on the VM series enables exceptionally heavy-duty machining.

High Rigidity Design

High Rigidity construction is achieved by 3D computer simulation.

Static rigidity

The high rigidity structure of VM series has raised the static rigidity up by 30% more than previous model with no weak point through FEM analysis.

Dynamic rigidity

Improving the frequency response and the damping ability of vibration makes it possible to increase the high eigenfrequency 30% up on the previous model.
The highly-rigid body structure is obtained by using the latest FEM analysis method, which optimizes the static and dynamic stiffness characteristics of the VM series. The resulting arch-shaped body structure provides an unrivalled level of rigidity, enabling an unsurpassed performance in heavy-duty machining.
Arch-shaped body

Broader Box Guideways

Compared to the previous models, the broader box guideways greatly improve the machine's dynamic characteristics.

Scraping of surface

The sliding surface of each guideway is bonded with Rulon® 142 to reduce friction, then hand scraped for a perfect fit.

Wider than previous Model

Longer than previous Model

Improves the machining durability of the Z-axis.

22 %
Z-axis Span width up!!!

32 %
Z-axis Span Length up!!!

SPINDLE

The unsurpassed quality and accuracy of the VM series achieves world-class performance in the machining of die & mold products.

Spindle motor power

15.6 kW 20.9 Hp

Max. spindle speed
12000 r/min

High Speed / Precision Built-in Spindle

Since the main spindle is supported by 4 rows of P4 level high precision bearings, it maintains stable precision under high speed cutting operation for long periods. Moreover, the high torque 15.6 kW (20.9 Hp) direct connection type main spindle motor is equipped for high speed mold processing.

Direct-coupled Spindle

Minimization of direct-connectiontype main spindle thermal deformation

Direct Coupling

Fanuc Spindle Motor

Tool Unclamp Cylinder

Oil Cooling

Cartride Type Spindle

Angular Ball Bearing

Low friction and heat generation of main spindle

Main spindle head cooling system

Actualization of low noise in accordance with adoption of special grease lubrication for main spindle cooling device and dramatic reduction of compressed air consumption allows minimization of main spindle thermal deformation.

* The results, indicated in this catalogue are provides as example. They may not be obtained due to differences in cutting conditions and environmental conditions during measurement.

OPTIMIZED TOOL PROCESSING SOLUTION

Superior surface finishes and machining accuracy are achieved through using standard processing solutions such as high-speed / high - precision contour control and thermal displacement compensation.
High speed / high precision contour control

- **DSQ1** (AICC2 _ 200 Block + Machining condition selection function)
- **DSQ2** option (DSQ1 + Data server [1GB])

✲Please contact DN Solutions to select detail specifications.

** If this option is selescted, the TSA(Through Spindle Air) function available. TSA Max.pressure is 0.54MP

(1) Please refer to foundation drawing in relation to anchoring. If more detail information want, consult with DN Solutions service

(2) In case of using neat cutting oil, this device is highly recommended in order to reduce the change of accuracy by rising the coolant temperatures.

(3) In case of TSC is not required and only TSA is needed, this option can be selected.

● Standard   ○ Optional   x Not applicable

⚠ Fire Safety Precautions | There is a high risk of fire when using non-water-soluble cutting fluids, processing flammable materials, neglecting the controlled and careful use of coolants and modifying the machine without the consent of the manufacturer. Always check the SAFETY GUIDELINES carefully before using the machine.
PERIPHERAL EQUIPMENT

Deliver excellent performance on diverse machining conditions.

Chip Disposal

Inner structure for effective chips and coolant flow

The inner structure of the VM series machines is designed to lead the flow of chips and coolant into a front-mounted chip pan for effective chip disposal.

1.
Through spindle coolant `option`
Middle pressure: 1.96 MPa (284.2 psi) (20 bar)
High pressure: 6.86 MPa (994.7 psi) (70 bar)

※ Measured at pump outlet with 60Hz power.

2.
Flood coolant

3.
Shower coolant `option`

4.
Internal screw conveyor

5.
Coolant Gun `option`

6.
Larger Coolant Tank Capacity

EZ WORK

The software developed by DN Solutions features numerous functions designed for convenience and ease of operation.

EZ work

The EZ work delivers speed and efficiency. This menu-driven innovation not only helps customers reduce setup times, but also simplifies common tasks and procedures, reducing the potential for errors. EZ work reduces operating time, protects machinery, enhances quality and speeds up maintenance interventions.

Tool Load Monitor

Function to automatically monitor tool load (Dierent loads can be set for one tool according to M700 ~ M704)

M/G-Code List

Functional description of M code and G code

Tool Management

Function to manage tool information [Tool information / Tool No. / Tool condition (normal, large diameter, worn / damaged, used for the rst time, manual) / Tool name]

Operation Rate

Machine operation history management function by date based on load

Adaptive Feed Control

Function to control feedrate so that the cutting can be carried out at a constant load (To adapt to the spindle load set up with constant load feedrate control function)

Spindle Warm Up

A function that assists spindle warm-up for spindle life when the spindle has not been used for a certain period of time

ATC Recovery

Function to view detailed info with recommended actions and to perform step-by-step operation manually (when an alarm is triggered during an ATC operation)

Addition of Optional Block Skip

In addition to the OPTIONAL BLOCK SKIP of the operation panel, the function to skip a specific block selected in the machining program

EZ WORK

Easy operation

Operator convenience and work efficiency have been improved with adoption of various convenient control functions and ergonomic design.

Operating console

1.
10.4" Color TFT LCD Monitor as Standard Feature
The wide screen displays more useful infromation for the operator. DN Solutions's customized pages make setting up, operating, and machine conditionmonitoring easier.

2.
Pentium Board is standard.

3.
Portable MPG
It makes workpiece setting easier for the operator

4.
Easier ATC operation and maintenance.
It gives much easier operation and maintenance for ATC.
Magazine : CW
Magazine : CCW

5.
PCMCIA Card

6.
Embedded Ethernet / RS-232C

7.
Swivelling Operating Console
The easy-to-use operation panel can swivel 0-90°

Accessibility

It is designed for easy install the workpiece by improving the operator's accessibility.

Workpiece Loading

Superior hardware specifications

The TNC 640 features optimized motion control, short block processing times and special control strategies. Together with its uniform digital design and its integrated digital drive control (including inverters), it enables you to achieve high machining speeds and the best possible contour accuracy.

- 15.6" display
- 21GB Storage memory
- 500 look ahead blocks
- High user convenience with folder structure data management

Conversational convenient function

Data are controlled in the folder structure; convenient communication via USB devices
